

GROCERYMIND

LIST FOOD, STAY FRESH, REDUCE WASTE

PRESENTED BY:

PRUTHVI PATEL (200509419)

POOJAN PATEL (200518202)

PROBLEM & SOLUTION

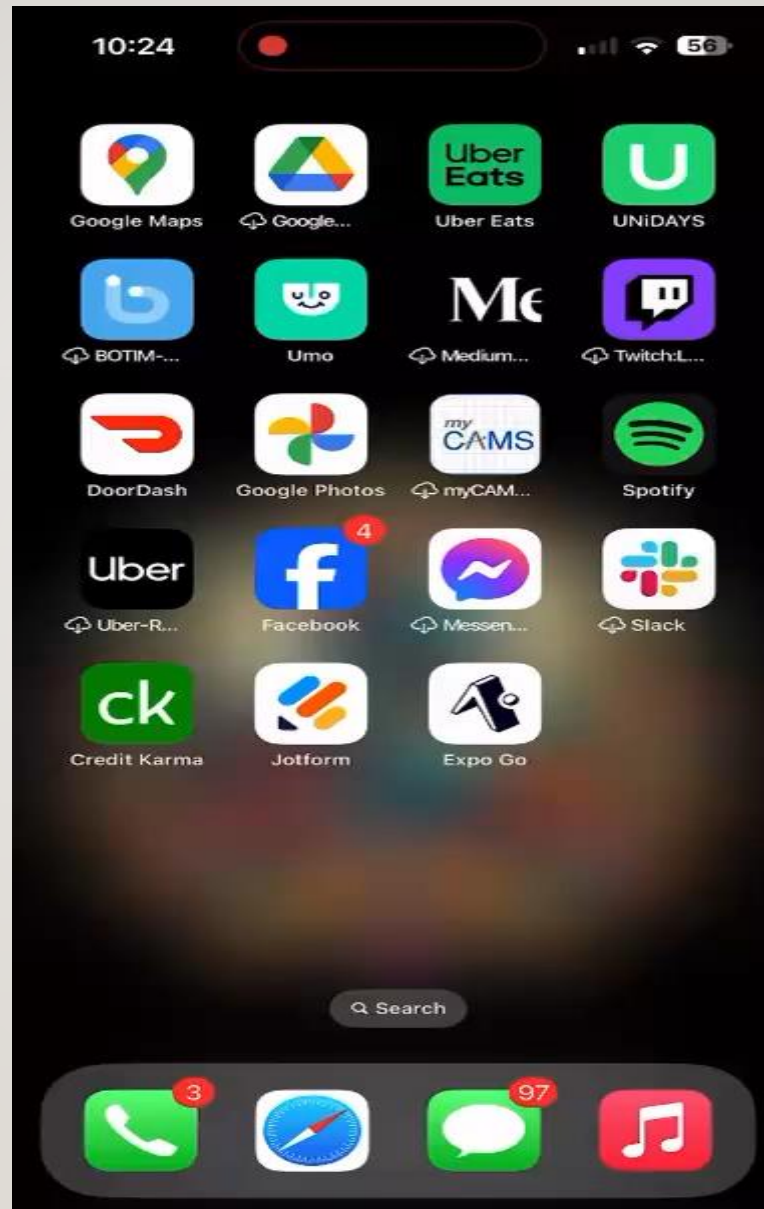

Problem Identification:

- Food waste is a global issue, contributing to SDG 12 (Responsible Consumption & Production)
- Many people struggle with tracking their groceries and pantry items, leading to forgotten purchases and food waste.
- Food items expire before use, resulting in unnecessary waste and financial loss.
- Lack of a simple and efficient way to list groceries and track expiry.

Proposed Solution:

- A food inventory listing system where users can add items to a list first and later get reminders for expiry dates.
- Helps users buy only what they need by checking their inventory before shopping.
- Reduces food waste, supporting SDG 12 (Responsible Consumption & Production).

ACTIVITIES

Activities during the past week:

- **Implemented user registration and login functionality**
- **Developed and integrated walkthrough screen**
- **Integrated a database for storing user authentication data.**
- **Created a home screen**
- **Implemented add/delete items, add expiry date, and add quantity functionalities.**

Activities planned for the next week:

- **Complete notification system implementation.**
- **Develop the smart shopping list feature.**
- **Implement Forgot password.**

THANK YOU!
