

Project Status report

Name:	Pruthvi Patel, Poojan Patel
Community & UN SDG(s):	SDG 12 - Responsible Consumption & Production
MVP #	4
Sprint cycle dates:	24/03/2025 – 06/04/2025

Project Name	GroceryMind
Blurb	GroceryMind is a smart grocery management platform designed to reduce household food waste and promote sustainable consumption. It combines inventory tracking, expiry reminders, and a smart shopping list into one easy-to-use system. Supporting UN SDG 12, the app empowers individuals and families to make mindful food choices while minimizing waste.
For Week Ending	07/03/2025
Project Status	Green
Status Description	The project status is marked green as all core features outlined in the initial plan have been successfully implemented. This includes inventory tracking, expiry reminders, shopping list management, and group collaboration. The app functions as intended and aligns with the goals set for the MVP, demonstrating a stable and complete solution.

Activities—During the past sprint cycle

- Implementation of notification system
- Final touch-up of the application
- Complete the research paper
- Complete other documents (Report & lessons learned out, User Manual, Applied class concepts to project)

Project Issues

Minor delays were encountered during notification setup due to backend integration challenges.

Project Changes

NA

Activities—Planned for Next Week

NA

Reflection

Do you feel "on track"? We are on good track as we have implemented most of the core functionalities
What progress do you particularly feel good (great) about? Successful implementation of application

University
of Regina

FACULTY OF ENGINEERING
& APPLIED SCIENCE

What barriers (if any) do you feel is/are a current impediment to success? Notification system implementation needs further refinement.

What help (if any) do you require to move positively forward? NA

What questions or concerns do you have (if any)? NA
